SUMMARY

B.Tech Computer Science student with an 8.95/10 CGPA and strong foundations in **Data Structures & Algorithms, Operating Systems, Computer Networks, and Object-Oriented Programming**, along with strong problem solving. Proficient in **Java, Python, C, and JavaScript**, with hands-on experience building and deploying production applications, **REST APIs, databases, and automation workflows**. **150+ LeetCode problems solved**, with experience in collaborative hackathon development and Agile engineering practices. Enthusiastic about contributing as a **SysAdmin Intern at D. E. Shaw India**.

EDUCATION

GITAM University, Visakhapatnam

Aug 2024 – May 2028 (Expected)

B.Tech, Computer Science and Engineering — 3rd Year | CGPA: 8.95 / 10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

TECHNICAL SKILLS

Languages: Java (OOP, Collections), Python, C, JavaScript (ES6+)

Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, Object-Oriented Design, Complexity Analysis, Problem Solving (150+ problems solved on LeetCode)

Systems & Engineering: Git/GitHub, Jira, Automated Testing (pytest), Agile/Scrum, REST APIs, CI-style Deployment (Vercel)

Databases: SQL (schema design, relational modeling, complex queries), MongoDB, PostgreSQL

Development: React, Node.js, Express.js, TypeScript, HTML5, CSS3

Enterprise/CRM Platform (Salesforce): Apex (classes, SOQL, SOSL, DML, triggers), Data Modeling, Flow Builder, Object Manager

Cloud & Tools: Supabase, Vercel, Vite, Kaggle Datasets, npm

PROJECTS

AgriCare — AI-Powered Agricultural Advisory Platform

agricare-dun.vercel.app

React, TypeScript, Node.js, Express.js, SQL (PostgreSQL/Supabase), REST APIs, Google Gemini Vision API

- Built a **Smart Crop Advisory engine** performing data-driven matching across 2,200+ soil records, returning ranked crop recommendations with confidence scores per query.
- Implemented **AI Plant Disease Detection** via image upload using a computer vision API, identifying disease severity and mapping results to locally available treatments.
- Designed a **relational database schema** (PostgreSQL) to model crop, scheme, and eligibility data with normalized tables and query-based filtering logic.
- Built REST API endpoints in **Node.js/Express.js** to connect the frontend, database, and external AI/weather services, handling request validation and error responses.
- Deployed and maintained the application in production on **Vercel**, with a live multilingual (Telugu/Hindi/English) assistant serving diverse end-user needs and real-time weather integration.

Linux System Health Monitor

Python, Linux, psutil, System Monitoring, Automation

- Developed a lightweight **Linux system monitoring utility** to track **CPU, memory, disk utilization, system uptime, running processes, and network connectivity**.
- Implemented **threshold-based health checks and alerts** to identify high resource utilization and potential system issues.
- Automated system diagnostics using Python and **psutil**, generating structured terminal reports for system troubleshooting and monitoring.

HACKATHONS & LEADERSHIP

- 3rd Place Winner** — Git-A-Thon Hackathon, GITAM University × EPOCH 4.0 × GitHub Community (Dec 2025): built a Campus Issue Tracker app from scratch in 24 hours as frontend lead; presented live to the judging panel.
- Qualified, Internal Round** — Smart India Hackathon (SIH), National Level (2025): contributed to solution design and technical prototyping.
- Team Lead** — Sushacks Hackathon: led a team building a student-tutor collaboration platform end-to-end.
- Top 25% of All Teams** — Firefighting Robot, GITAM Technology Expo (Apr 2025): designed and demonstrated an autonomous robotics prototype, placing in the top 25% for innovation and engineering quality.

CERTIFICATIONS

Salesforce Trailhead Badges: Platform Development Basics, Data Modeling, Apex Basics & Database, Flow Builder Basics — covering platform architecture, custom object/data modeling, Apex (DML, SOQL/SOSL, exception handling), and declarative Flow Builder automation.

Other Certifications:

Jira Fundamentals (Agile/Scrum) — Coursera, 2026 | Power Automate Applied Skills — Microsoft, 2026 | Problem Solving (Basic) — HackerRank, 2024 | Full Stack Web Dev — Udemy (Angela Yu), 2026 | GenAI Mastery Workshop — OpenAI × NxtWave, 2025
